Chapter 1 Administration
  1.1 Scope
  1.2 Purpose
  1.3 Application
  1.4 Retroactivity
  1.5 Equivalency
  1.6 Units and Formulas
  1.7 Code Adoption Requirements

Chapter 2 Referenced Publications
  2.1 General
  2.2 NFPA Publications
  2.3 Other Publications
  2.4 References for Extracts in Mandatory Sections

Chapter 3 Definitions
  3.1 General
  3.2 NFPA Official Definitions
  3.3 General Definitions

Chapter 4 Reserved

Chapter 5 Reserved

Chapter 6 Reserved

Chapter 7 Reserved

Chapter 8 Reserved

Chapter 9 Reserved

Chapter 10 Fundamentals
  10.1 Application
  10.2 Purpose.
  10.3 Equipment
  10.4 Personnel Qualifications.
  10.5 Power Supplies.
  10.6 Signal Priority.
  10.7 Distinctive Signals
  10.8 ECS Priority Signals
  10.9 Fire Alarm Signals.
  10.10 Fire Alarm Signal Deactivation.
  10.11 Supervisory Signals.
  10.12 Trouble Signals
  10.13 Emergency Control Function Status Indicators.
  10.14 Performance and Limitations
  10.15 Protection of Fire Alarm System
  10.16 Annunciation and Annunciation Zoning
  10.17 Monitoring Integrity
  10.18 Documentation
  10.19 Impairments

Chapter 11 Reserved

Chapter 12 Circuits and Pathways
12.1 Application
12.2 General
12.3 Pathway Class Designations
12.4 Pathway Survivability
12.5 Nomenclature
Chapter 13 Reserved

Chapter 14 Inspection, Testing, and Maintenance
14.1 Application
14.2 General
14.3 Inspection
14.4 Testing
14.5 Maintenance
14.6 Records
Chapter 15 Reserved
Chapter 16 Reserved

Chapter 17 Initiating Devices
17.1 Application
17.2 Purpose
17.3 Performance-Based Design
17.4 General Requirements
17.5 Requirements for Smoke and Heat Detectors
17.6 Heat-Sensing Fire Detectors
17.7 Smoke-Sensing Fire Detectors
17.8 Radiant Energy—Sensing Fire Detectors
17.9 Combination, Multi-Criteria, and Multi-Sensor Detectors
17.10 Gas Detection
17.11 Other Fire Detectors.
17.12 Sprinkler Waterflow Alarm-Initiating Devices
17.13 Detection of the Operation of Other Automatic Extinguishing Systems
17.14 Manually Actuated Alarm-Initiating Devices
17.15 Fire Extinguisher Electronic Monitoring Device
17.16 Supervisory Signal—Initiating Devices

Chapter 18 Notification Appliances
18.1 Application
18.2 Purpose
18.3 General
18.4 Audible Characteristics
18.5 Visible Characteristics — Public Mode
18.6 Visible Characteristics — Private Mode
18.7 Supplementary Visible Signaling Method
18.8 Textual Audible Appliances
18.9 Textual Visible Appliances
18.10 Tactile Appliances
18.11 Standard Emergency Service Interface

Chapter 19 Reserved
Chapter 20 Reserved

Chapter 21 Emergency Control Functions and Interfaces
21.1 Application
21.2 General
21.3 Elevator Recall for Fire Fighters’ Service.
21.4 Elevator Shutdown
21.5 First Responders Use Elevators
21.6 Elevators for Occupant-Controlled Evacuation.
21.7 Heating, Ventilating and Air-Conditioning (HVAC) Systems
21.8 Door Release Service
21.9 Electrically Locked Doors.
21.10 Exit Marking Audible Notification Systems

Chapter 22 Reserved

Chapter 23 Protected Premises Fire Alarm Systems
23.1 Application
23.2 General
23.3 System Features
23.4 System Performance and Integrity
23.5 Performance of Initiating Device Circuits (IDCs)
23.6 Performance of Signaling Line Circuits (SLCs)
23.7 Performance of Notification Appliance Circuits (NACs)
23.8 System Requirements
23.9 In-Building Fire Emergency Voice/Alarm Communications
23.10 Prerecorded (Digital) Voice and Tone Fire Alarm Systems.
23.11 Two-Way Communication Service
23.12 Signal Annunciation
23.13 Suppression System Actuation
23.14 Off-Premises Signals
23.15 Guard’s Tour Supervisory Service
23.16 Suppressed (Exception Reporting) Signal System
23.17 Protected Premises Fire Safety Functions
23.18 Special Requirements for Low-Power Radio (Wireless) Systems

Chapter 24 Emergency Communications Systems (ECS)
24.1 Application
24.2 Purpose
24.3 General
24.4 One-Way Emergency Communications Systems
24.5 Two-Way, In-Building Emergency Communications Systems
24.6 Information, Command, and Control
24.7 Performance-Based Design of Mass Notification Systems

Chapter 25 Reserved

Chapter 26 Supervising Station Alarm Systems
26.1 Application
26.2 General
26.3 Alarm Systems for Central Station Service
26.4 Proprietary Supervising Station Systems
26.5 Remote Supervising Station Alarm Systems
26.6 Communications Methods for Supervising Station Alarm Systems.

Chapter 27 Public Emergency Alarm Reporting Systems
27.1 Application
27.2 General Fundamentals
27.3 Management and Maintenance
27.4 Communications Methods.
27.5 Alarm Processing Equipment
27.6 Alarm Boxes.
27.7 Public Cable Plant
27.8 Emergency Communications Systems (ECS)

Chapter 28 Reserved

Chapter 29 Single- and Multiple-Station Alarms and Household Fire Alarm Systems
29.1 Application
29.2 Purpose
29.3 Basic Requirements
29.4 Assumptions
29.5 Detection and Notification
29.6 Power Supplies
29.7 Equipment Performance
29.8 Installation
29.9 Optional Functions
29.10 Maintenance and Tests
29.11 Markings and Instructions

Annex A Explanatory Material
Annex B Engineering Guide for Automatic Fire Detector Spacing
Annex C System Performance and Design Guide
Annex D Speech Intelligibility
Annex E NEMA SB 30, Fire Service Annunciator and Interface
Annex F Sample Ordinance Adopting NFPA 72
Annex H Informational References
Annex I Cross-Reference Table
Index
