Universal Stopper® Wins Three Awards in 2019

**NEW PRODUCT
AWARD 2019**

Striving to Make False Fire Alarms a Thing of the Past

STI is excited and proud to announce the Universal Stopper fire alarm protective cover won the gold award in the *Spaces4Learning* Fire & Life Safety category! The protective cover also won the *Buildings* Money Saving Product award and the *Secure Campus* award earlier this year.

The Universal Stopper (STI-13020FR) is an indoor/outdoor polycarbonate cover which offers excellent protection against false fire alarms, physical damage (both accidental and intentional), dust and grime as well as severe environments inside and out.

The winning product protects dual action pull stations without restricting legitimate operation. When the cover is lifted to gain access to the actual alarm, a piercing warning horn sounds. Immediate attention is drawn to the area and the prankster will either run or be caught before a false alarm is pulled. Does not restrict use for a real fire.

Preventing false fire alarms can help avoid possible municipal fees, disruption, lost revenue, and a loss of productivity from building occupants, employees, staff members and/or students. Reducing false fire alarms also allows firefighters to be available for a real fire or emergency.

Quality constructed and time-tested, this series is UL/cUL Listed and ADA Compliant. Many mounting options and colors are available.
